

## KOMBISAVE

The new benchmark for protection and control  
with IEC 61850, distance, transformer differential,  
motor, overcurrent, frequency, voltage and earth  
fault protection

Solid, SAVE, swiss made.

## APPLICATION

- Utility and industrial power distribution
- Radial, looped and meshed networks
- Isolated, resistance or impedance earthed neutral network
- Single or double busbar configurations
- One or two breakers, numerous switching devices
- Manually or motor operated disconnectors and earthing switches

## PURE AND SIMPLE IED

- Easy to use: protection, control and measurement IED
- IEC 61850 Architecture including GOOSE and MMS
- App-based concept for software options:  
Add protection modules at any time.
- Complete portfolio of protection functions:  
from definite-time protection to QV through check synchronism and distance protection and auto-reclosing
- Small, compact, powerful
- Profitability through high functional density
- Long lifespan due to extremely low energy consumption
- Support also IEC 60870-5-103 communication
- Two communication protocols in parallel
- Galvanic or optical communication is available
- Service interface based on USB 2.0 for configuring KOMBISAVE products and use USB Flash Drives.
- No back-up batteries inside

As a competent partner, we offer more than just products. We take responsibility for planning through commissioning and support the ongoing maintenance.

This is our tradition since 1998.

Welcome to NSE.

Grid . Protection . Development

## THE KOMBISAVE-FAMILY – SWISS MADE

### KOMBISAVE

Ideal for transmission and distribution in medium voltage

### KOMBISAVE+

Made for double busbar system  
in substations

## KOMBISAVE VERSIONS

RN

+RN

Overcurrent and motor protection with feeder control system

BASIC  
50/51, 50/51N, 49I&II, 68, 79

MOTOR  
14, 37, 46PD, 46, 51M

IN ADDITION  
66/86, 85, 85N, 50KSE, 50BF, 74TC

CONTROL  
CB, DCC, CBT, CBAY, XCBR, LOC, CILO

MEASUREMENT : 4 CTs  
3I, IO, 3I/15min, Ith

STATUS COLLECTION  
Customized protection and control information can be displayed on virtual parameterizable LEDs and dynamic texts

LOGIC  
Integrated PLC

COMMUNICATION  
USB 2.0, IEC 60870-5-103, IEC 61850 with Fast- and Slow-GOOSE and MMS, Ethernet

FORMATS  
XML, COMTRADE, XRI0, MMS, GOOSE

RF

+RF

Feeder protection with earth fault detection system, distance protection and control system

BASIC  
50/51, 50/51N, 49I&II, 68, 79  
67, 67N, 32N, 67NIEF, 59G

DISTANCE PROTECTION  
21, 21N, 21FL

SMART GRID  
QU, UFLS, 810/U, 27/59

IN ADDITION (+ RN functionality)  
470, 25, 60, MCS31, 47

CONTROL  
CB, DCC, CBT CBAY, XCBR, LOC, CILO

MEASUREMENT: 4 CTs, 4 or 5 VTs  
3I, IO, 3I/15min, Ith, 3ULE, 3ULL, U0, PQS, f, cos, Udifff, fdiff, R/X, km/miles

STATUS COLLECTION  
Customized protection and control information can be displayed on virtual parameterizable LEDs and dynamic texts

LOGIC  
Integrated SPS

COMMUNICATION  
USB 2.0, IEC 60870-5-103, IEC 61850 with Fast- and Slow-GOOSE and MMS, Ethernet

FORMATS  
XML, COMTRADE, XRI0, MMS, GOOSE

+RQ

Stabilized two winding transformer differential with integrated control system

BASIC  
50/51, 50/51N, 49I&II, 68

TRANSFORMER DIFFERENTIAL PROTECTION  
Amplitude and switching group adjustment, innovative stabilization characteristics  
50P, 87T, 24

IN ADDITION  
66/86, 85, 85N, 50KSE, 50BF, 74TC

CONTROL  
CB, DCC, CBT CBAY, XCBR, LOC, CILO

MEASUREMENT: 8 CTs  
3I, IO, 3I/15min, Ith, Idiff, Istab

STATUS COLLECTION  
Customized protection and control information can be displayed on virtual parameterizable LEDs and dynamic texts

LOGIC  
Integrated SPS

COMMUNICATION  
USB 2.0, IEC 60870-5-103, IEC 61850 with Fast- and Slow-GOOSE and MMS, Ethernet

FORMATS  
XML, COMTRADE, XRI0, MMS, GOOSE

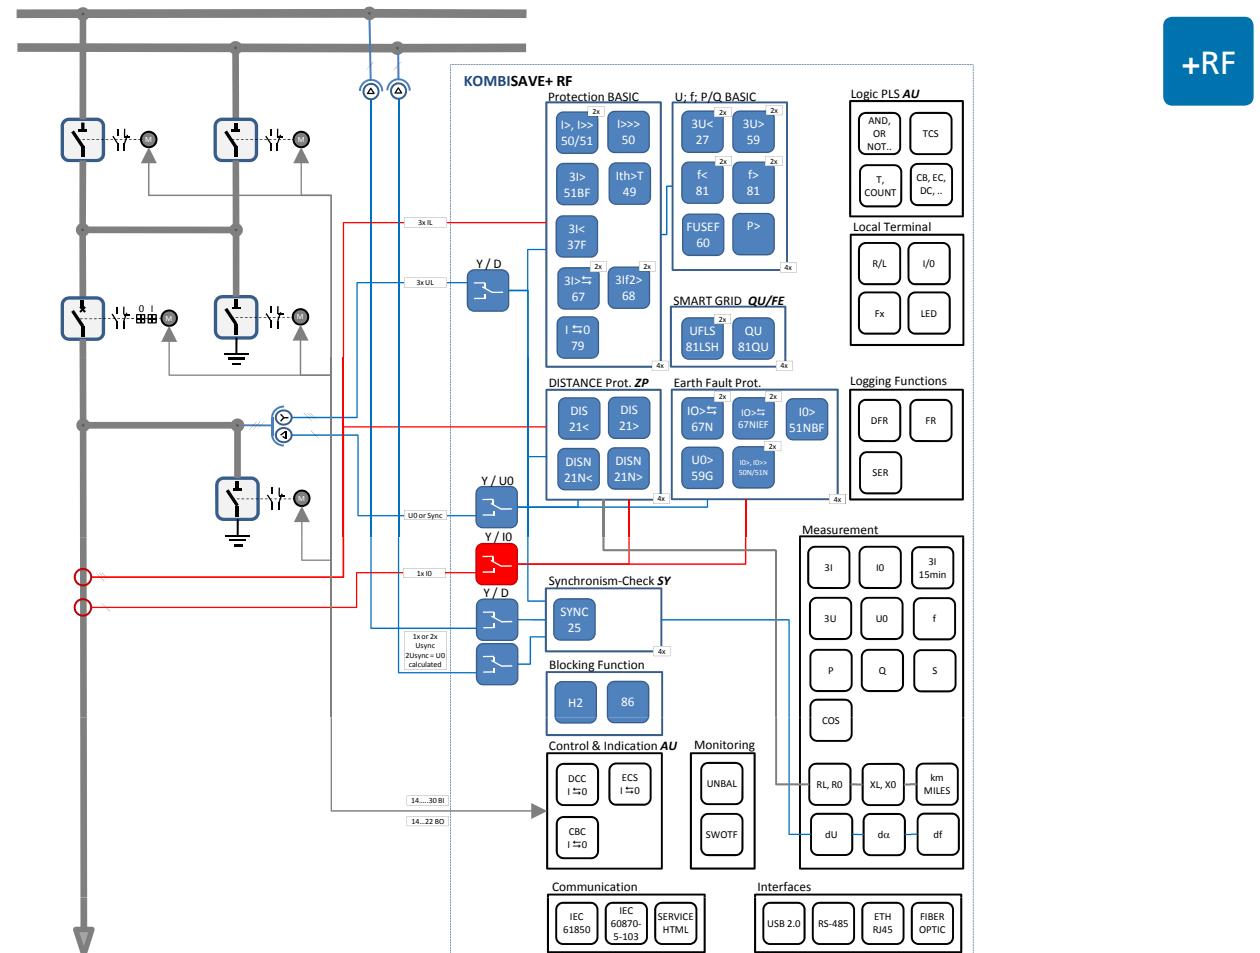

## FEEDER PROTECTION AND CONTROL IED

Meshed and Isolated Neutral  
Network Double Busbar System  
IEDs with Communication to  
SCADA System

## BLOCK DIAGRAM OF A HIGH VOLTAGE DOUBLE BUSBAR SYSTEM AND A IED KOMBISAVE+ RF

- Radial, Looped and Meshed Networks
- Isolated, Resistance or Impedance Earthed Neutral Network
- Distance Protection
- Earth Fault Protection
- Fault Locator
- Synchronism Check
- Under Frequency Load Shedding
- Double Busbar Bay Control
- Integrated PLC
- IEC 61850
- IEC 60870-5-103

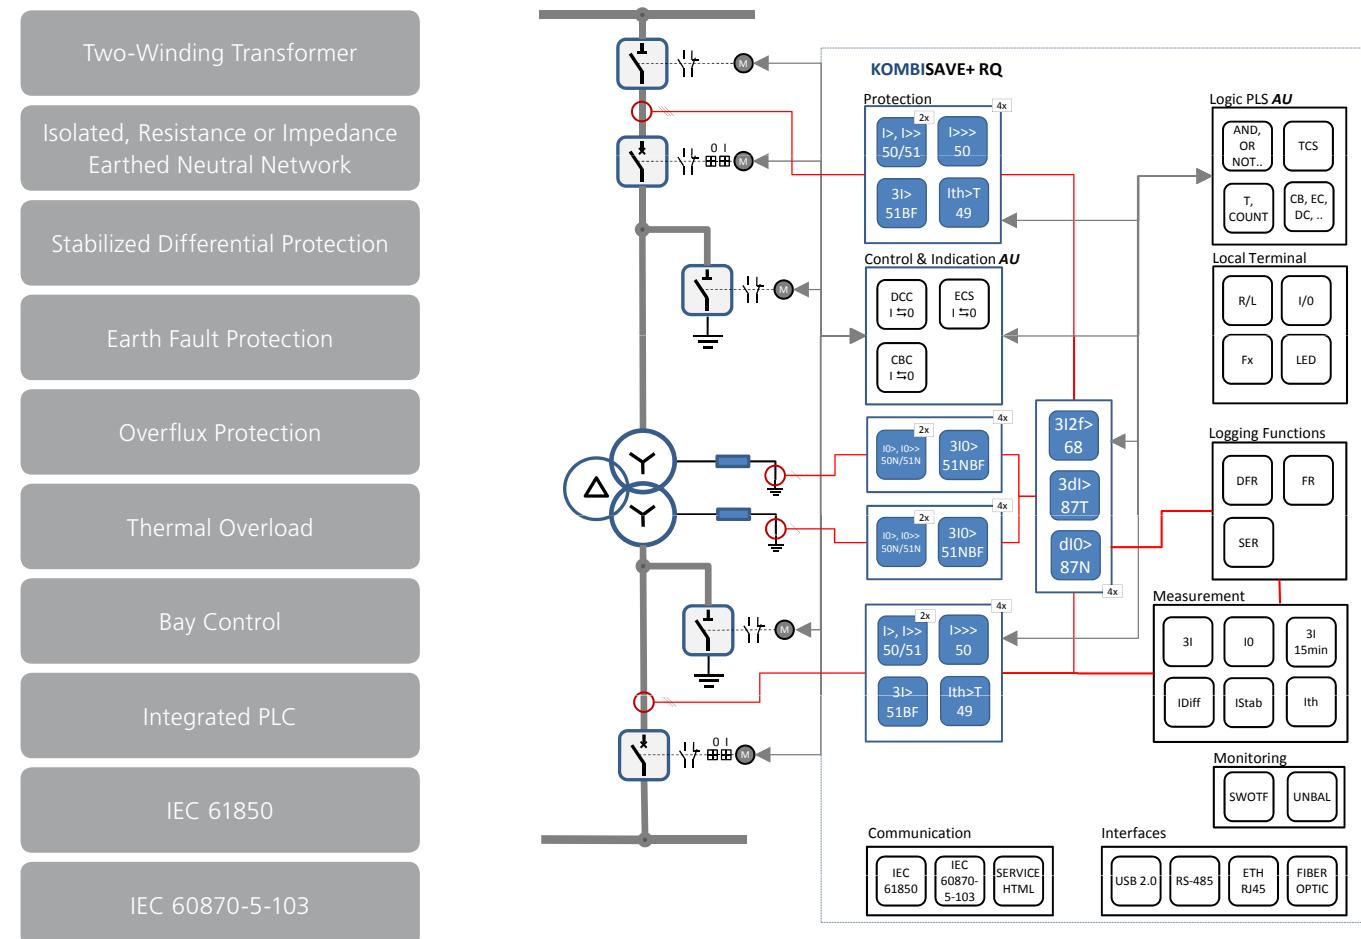

## TRANSFORMER DIFFERENTIAL PROTECTION AND CONTROL

110/20kV Transformer with  
Direct Earthed Star Point on  
High Voltage Side, YDy0

## BLOCK DIAGRAM OF A HIGH VOLTAGE TRANSFORMER SYSTEM AND A IED KOMBISAVE+ RQ

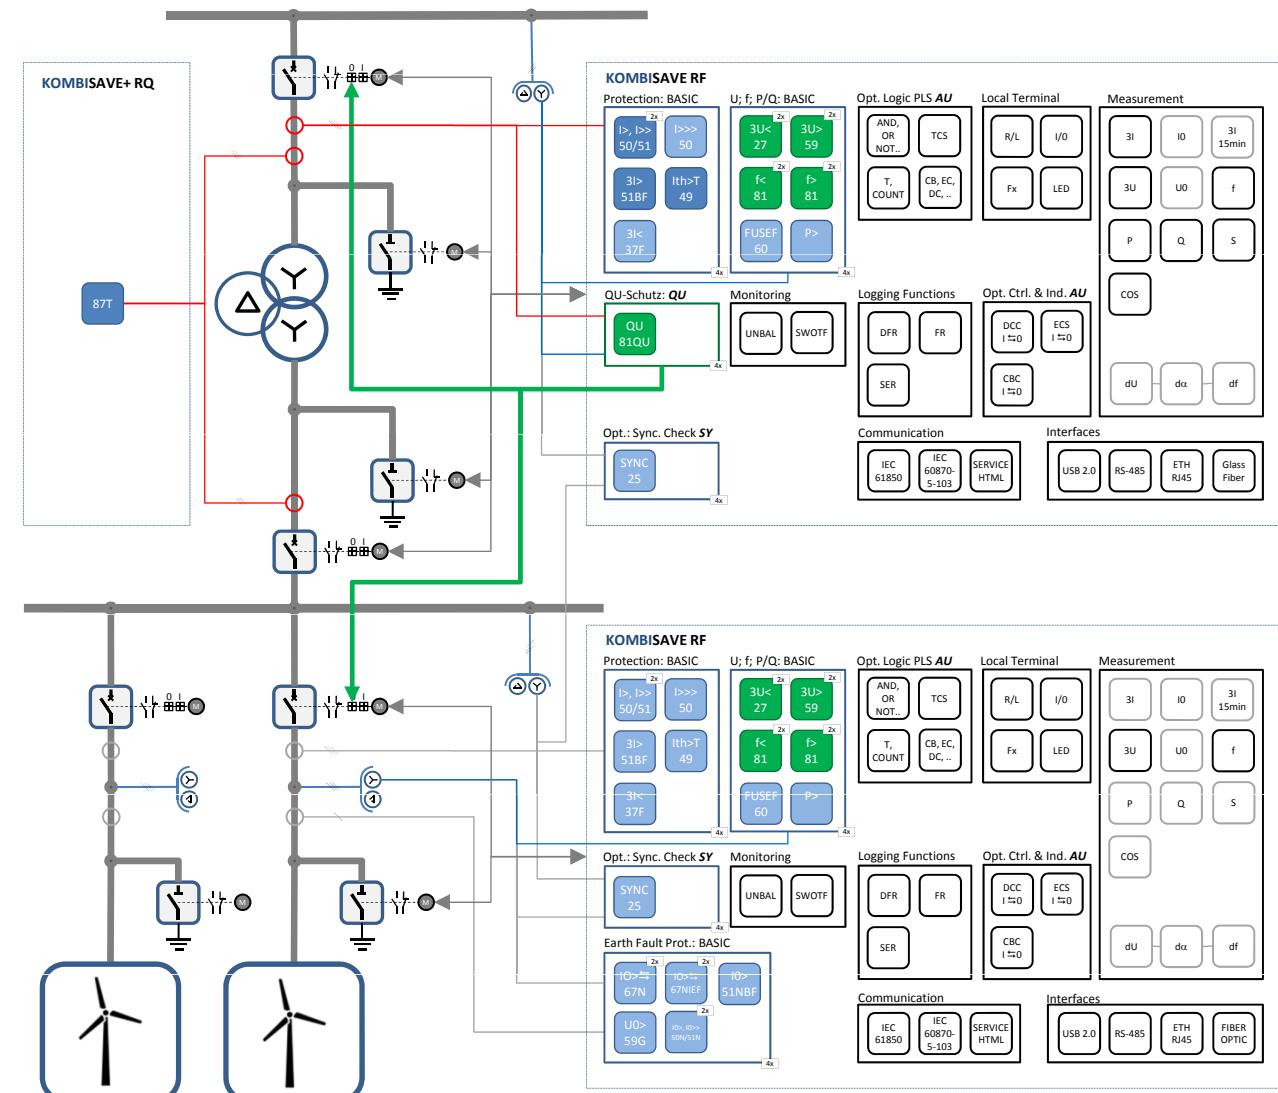

## SMART GRID PROTECTION AND CONTROL

Wind Turbines Park  
with Infeed to 110kV

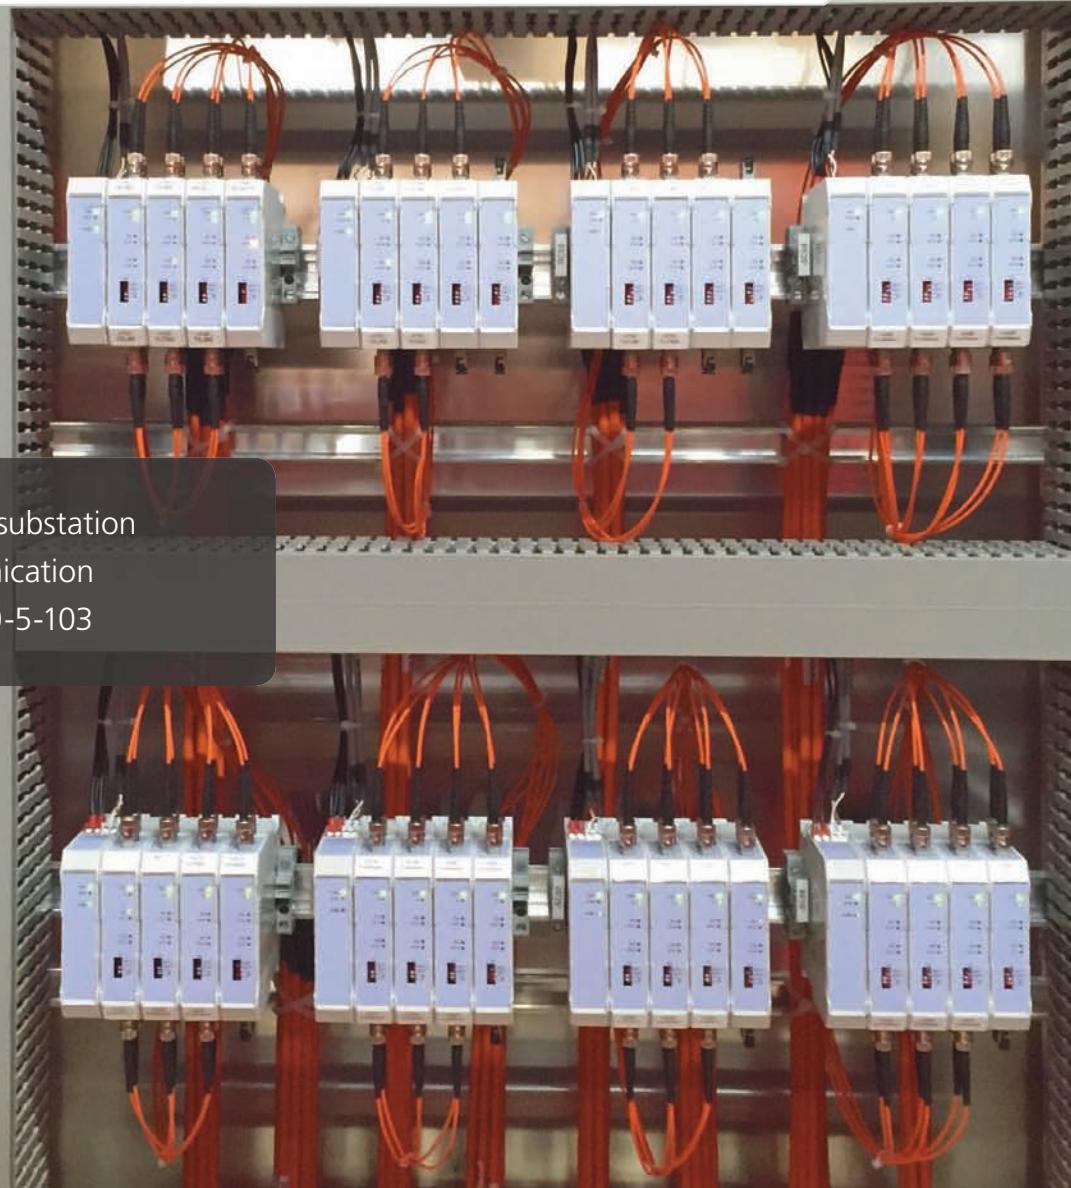

## SMART GRID CONFIGURATION WITH IED

- Energy Producer
- Short Circuit and Earth Fault Protection, Network Stabilization
- Over-/Under-Voltage Protection
- Over-/Under-Frequency Protection
- Reactive Power versus Under Voltage Protection (QV)
- Synchronism and Energizing-Check
- Bay Control
- Integrated PLC
- IEC 61850
- IEC 60870-5-103

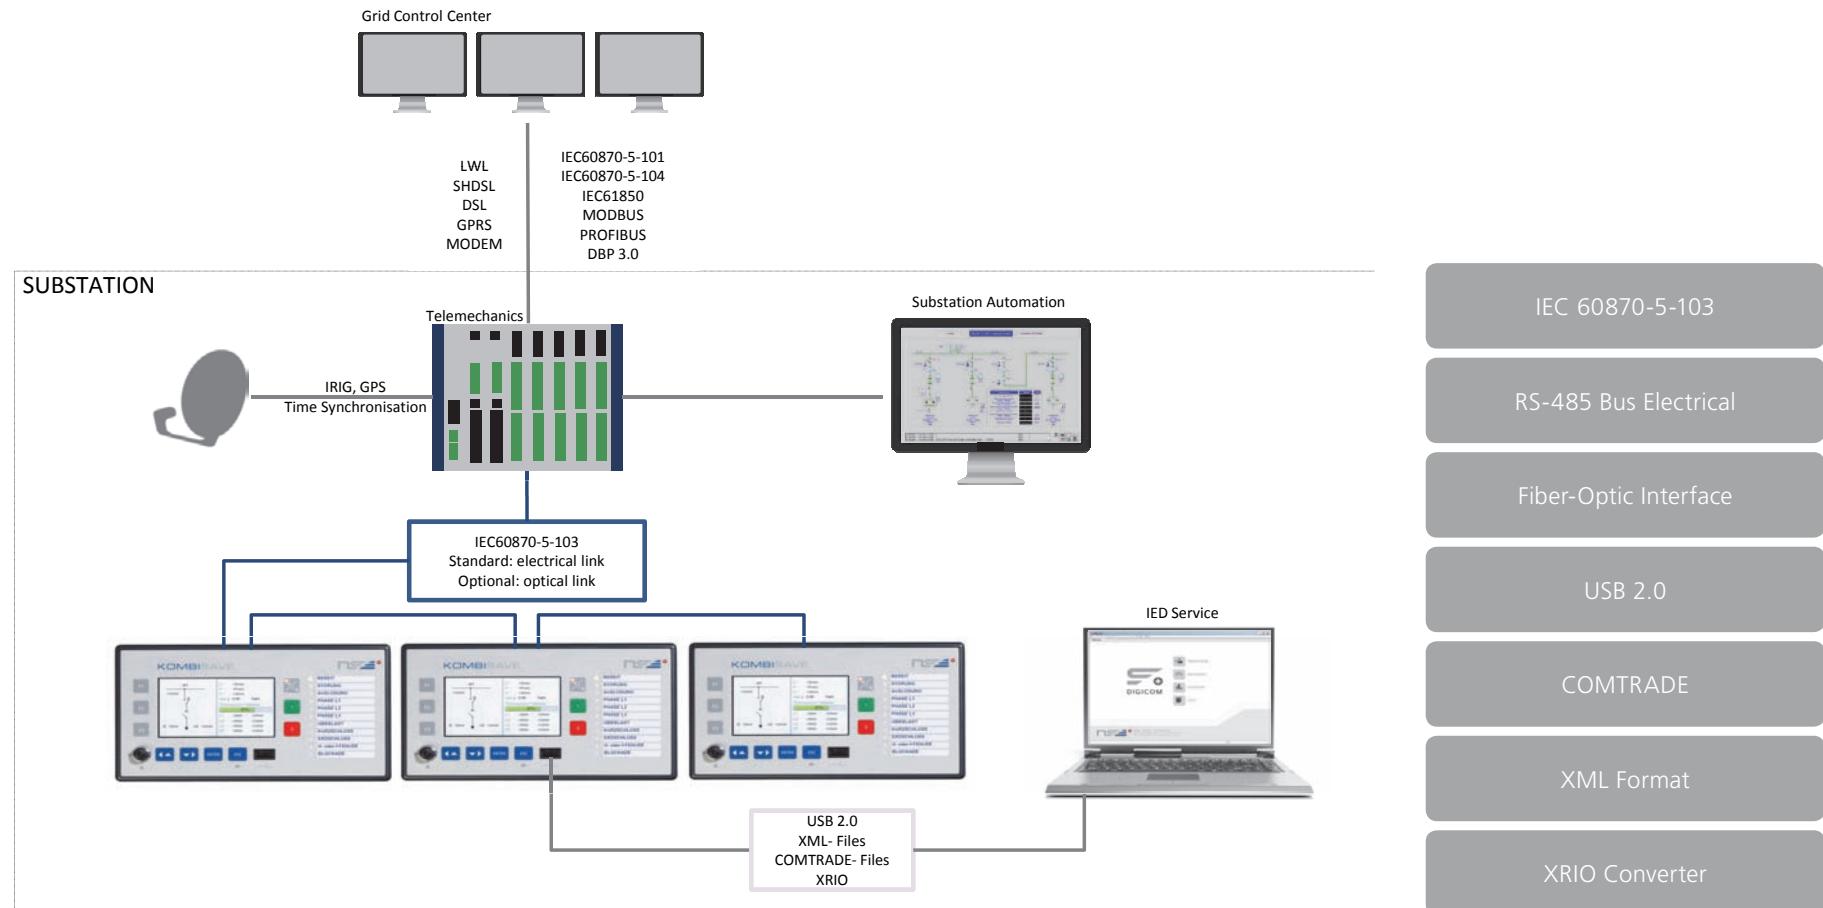

## COMMUNICATION

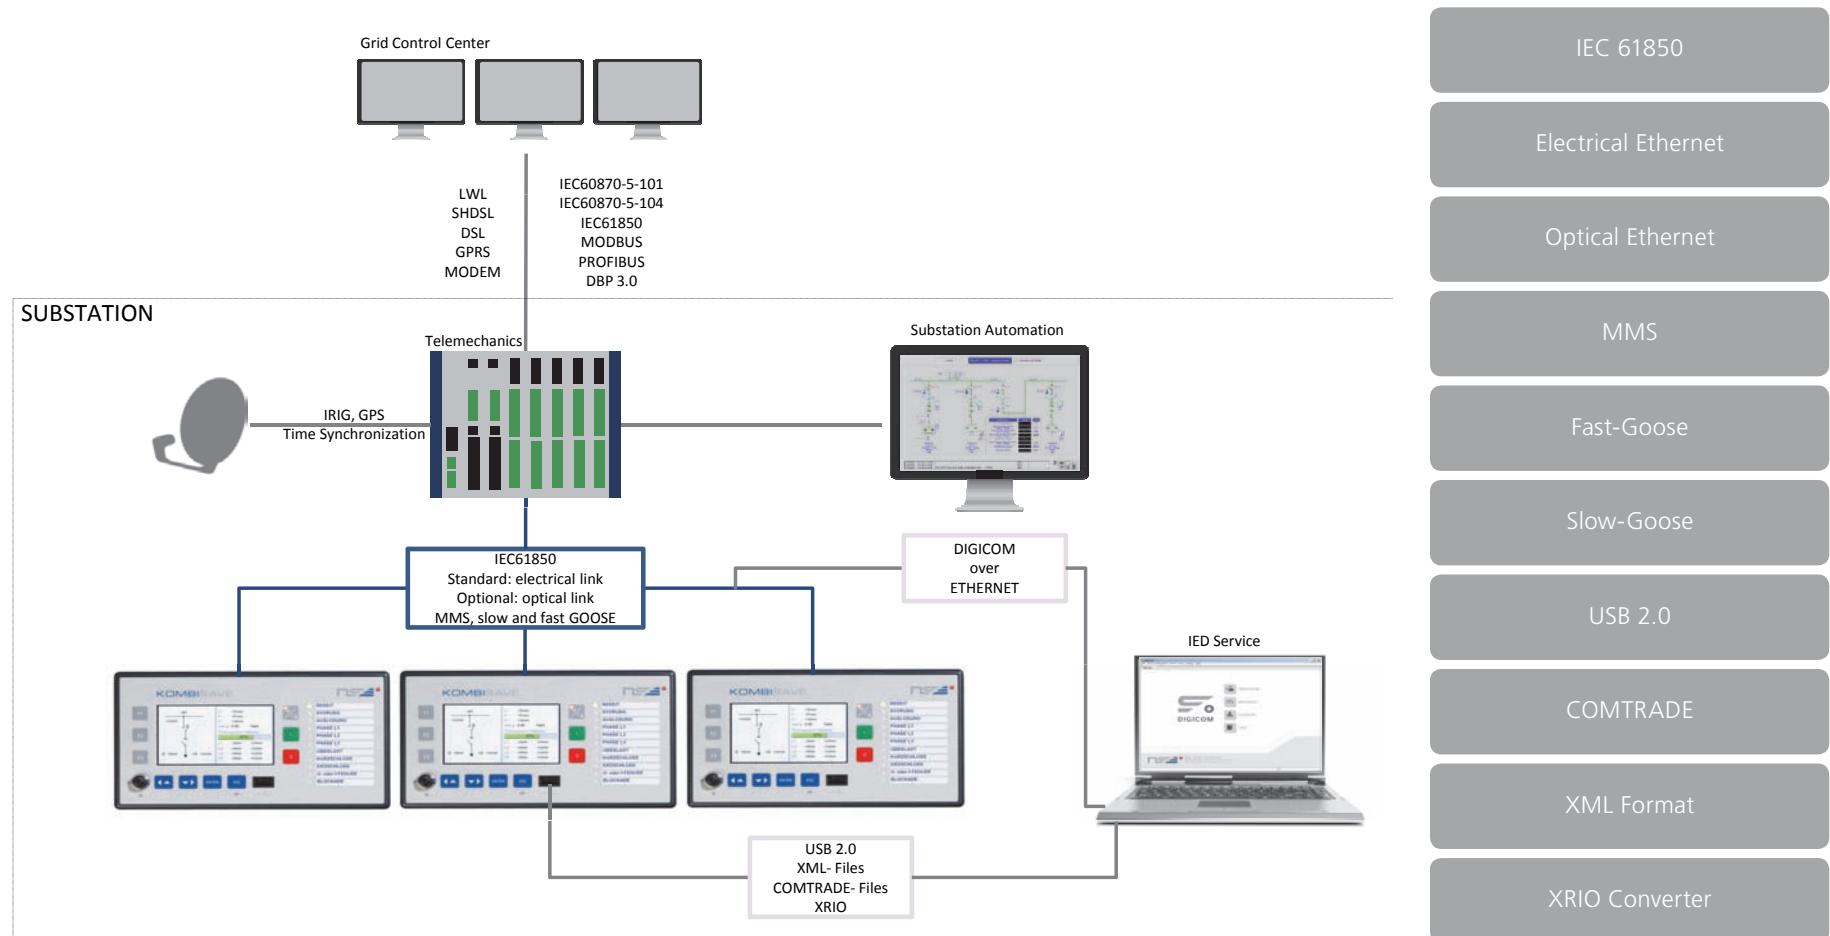

Star coupler in the substation  
Optical communication  
using IEC 60870-5-103

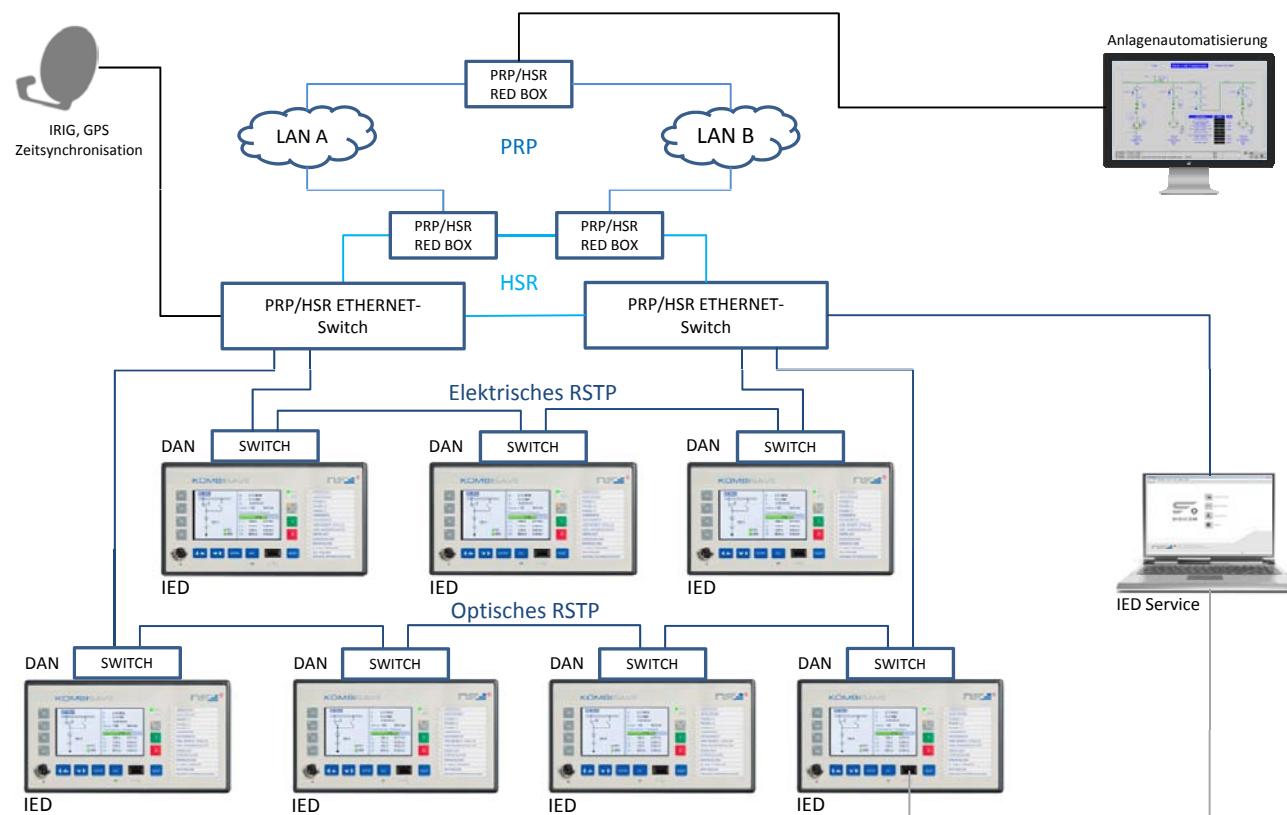

## COMMUNICATION ESTABLISHED WITH IEC 60870-5-103

## COMMUNICATION ESTABLISHED WITH IEC 61850

## COMMUNICATION ESTABLISHED WITH IEC 61850

**IED:** Intelligent Electronic Device  
KOMBISAVE

**DAN:** Double Attached Node  
As of 2017 an integrated optical switch is available for KOMBISAVE+ devices.

**HSR:** High availability Seamless Redundancy  
Parallel data transmission into both parts of the Ethernet ring.  
There is no delay when one component of the ring fails.

**PRP:** Parallel Redundancy Protocol  
Parallel data transmission using two redundant networks.  
Continuous operation in case of error.  
No data is lost or delayed.

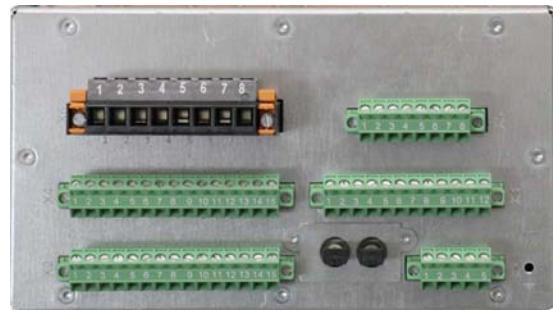

**RSTP:** Rapid Spanning Tree Protocol  
Data transmission in a ring which is virtually «open» at one point.  
Short delay when one component of the ring fails. Transition to new topology happens automatically.

## OPERATION

	KOMBISAVE	KOMBISAVE+ RN/RF/RQ
Navigation keys	4	4 with LEDs
Function keys, configurable	3	
RESET key	-	•
Tri-color LEDs, configurable	11	15
System status LEDs	-	2
R/L key illuminated	•	•
Key switch	•	•
I/O keys	•	•
User configurable display	•	•
Station visualization and control, configurable	•	•
Measurement displays	•	•
Multi-color virtual LEDs for status collection	•	•
Multi-color dynamic texts for status collection	•	•
Multiple display pages, configurable	•	•

## CONNECTORS

KOMBISAVE X1-I4U4X-BI14BO14-RS-RO

Option IEC 60870-5-103  
with fiber optic interface

KOMBISAVE X1-I4U4X-BI26BS14-RS-EE

Option IEC 61850  
with electric Ethernet interface  
Version with 26 binary inputs

KOMBISAVE+ RF X1-I4U5X-B2C2-RS-EO

Option IEC 61850  
with fiber optic Ethernet interface  
Bx connectors on X3/X4  
Cx connectors on X7/X8

### KOMBISAVE+

- Short circuit connector for current inputs
- High quality plug-in connectors
- Grounding via flexible copper strap

## SOFTWARE

### DIGICOM BASIC: (free of charge)

Reading out  
Parameterize  
Compare parameters  
Documentation  
PLC automation (KiCAD)  
XRIO-Converter

(for Windows XP, Windows 7 32/64Bit, Windows 10)

### DIGICOM ADVANCED:

Measurement  
Testing  
Analyze COMTRADE (DIGIVIEW)  
Visualize of distance and differential protection characteristics  
Protocol testing tool for IEC 60870-5-103  
Engineering and testing tool for IEC 61850

(for Windows XP, Windows 7 32/64Bit, Windows 10)

#### DIGICOM

DIGICOM is a powerful, easy to use and free software tool used to setup and manage KOMBISAVE products and allows users to easily manage NSE devices settings files from a single application. The protection relays are parameterized via the front interface (USB) or via the rear Ethernet-Port. A comprehensive measuring center allows monitoring circuit faults. The circuit faults are saved in the COMTRADE V91 or V99 format. Convenient COMTRADE viewer DIGIVIEW is an integral part of the DIGICOM advanced software package. The IED measuring center shows the actual state of the protection relay and includes feature to upgrade the IED-firmware.

#### Benefits of DIGICOM

- Toolset for the complete support and management of all SAVE protection relays
- Supports commissioning of protection relays
- Create, edit and version control of setting files offline or connected
- Provides a simple and intuitive method for configuring
- No installation required (launch from USB Flash Drive, local drive or network drive)
- Multilingual (German, English, French, Italian) with ability to switch languages without restarting
- Runs up to Windows 7

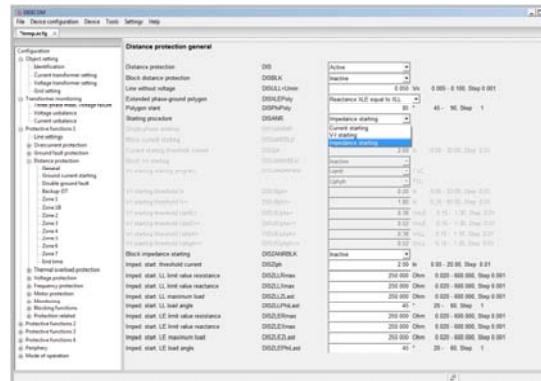

#### Operation

- Complete support and management of SAVE products
- Archiving setting files
- Comparing setting files
- Create/manage logic
- Create/manage graphic field control
- Communicating with SAVE protection relays
- Import parameters in OMICRON XRIO

#### Manuals

- Device manuals in PDF format

## PARAMETRIZATION WITH DIGICOM

### Object setting

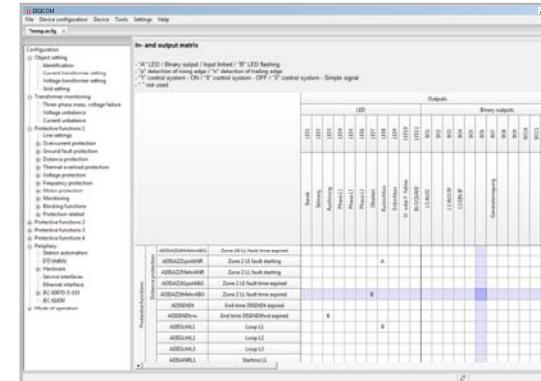

- Device identification: Description of the IED with address, installation site and creator
- Current and voltage transformer settings: Grounding direction, 1/5A, 100,110,400VAC
- Primary values, wiring of CT/VT
- Grid setting, star point treatment (isolated, compensated, impedance or resistance earthed network), rotary field direction

### Transformer monitoring

- Current and voltage unbalance
- Monitoring of three phase voltage failure

### Protective functions 1-4

- Line data (fault location in km or miles, grounding factor)
- Protection functions (inactive functions or parameters are grayed out)
- Clearly arranged parameterization by grouping and tree structure

### Periphery

- Station automation with PLC
- I/O matrix (links in- and outputs)
- LEDs (set color, latch on start)
- Binary in- and outputs (minimum activation time of outputs, switch-on threshold of inputs)
- Service interfaces
- Ethernet (settings)
- IEC 60870-5-103 (settings, signal mapping)
- IEC 61850 (settings)

### Mode of operation

- Measured values
- Switch parameter set
- Fault recorder memory

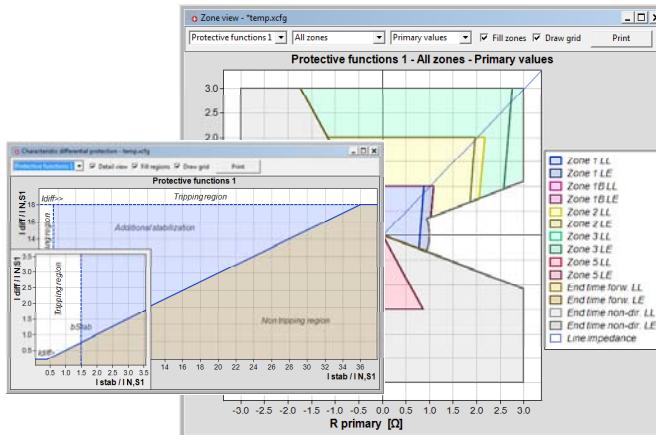

### I/O- Matrix

#### Sources

- Binary inputs
- Protective functions
- General signals

## STATION ENGINEERING

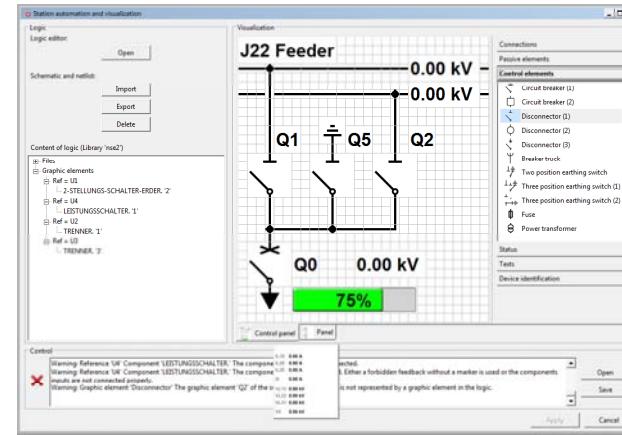

### Device

- Status and values ONLINE from system
- Receive: Event and fault records
- Test center for protective functions

### Tools

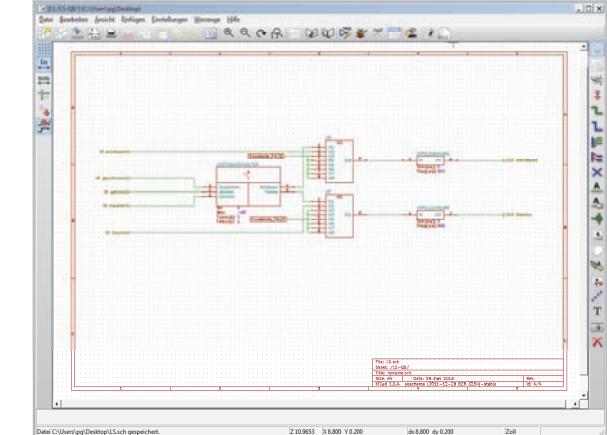

- Graphic visualization of the distance protection settings
  - R/X diagram for LL and LE  
Maximum load and load angle for under impedance starting
- Visualization of tripping characteristic for differential protection

### Create the Station Automation

#### Visualization

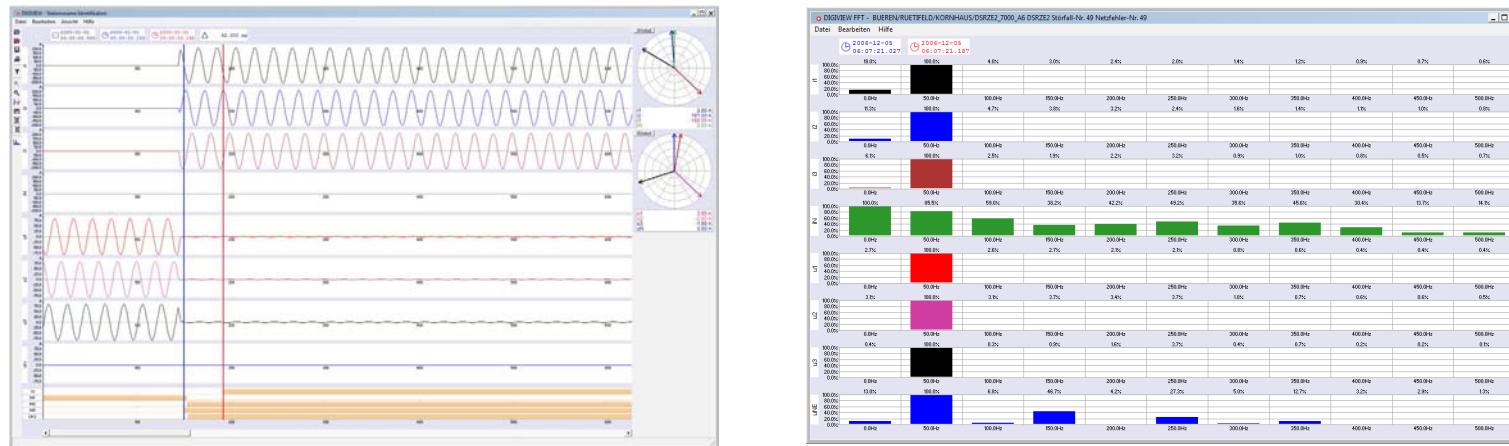

- Single-line diagram with lines, points, earth symbols and feeders
- Visualize the status of the primary and secondary process
- User configurable status panels with measured values
- Virtual LEDs and dynamic texts
- Circuit breaker, earthing switch, disconnector
  - Different graphics available
- Plausibility and status tests on import of KiCAD logic into DIGICOM
- Interface to programmable logic (PLC)

### Programmable Logic System Software

- Layering allows creation of hierarchical schematics
- Integrated library browser
  - Logic in- and output
  - AND, OR, NOT, XOR
  - RS-Flip-Flop
  - Up- and down-counter
  - Different types of timers
  - Several types of breakers (CB, DC, ED)
- Import of images possible
- Drawing switchgear plans possible

## FAULT ANALYSIS / DIGIVIEW: FAULT DATA ANALYSIS

Fault data records can be displayed and evaluated with DIGIVIEW. COMTRADE files are supported according to IEEE C37.111-1991 and IEEE C37.111-1999.

Extended analysis functions such as calculating the RMS value, displaying the vectors, and analyzing the harmonic distortion are possible. The percentage parts of the individual harmonics are calculated using Fourier transform. Complex issues such as transient states at transformers can also be reproduced.

DIGIVIEW requires a DIGICOM Advanced license.

- Open all standard COMTRADE files
- Analyzing primary and secondary readings
- Instantaneous values or RMS
- Dynamic current and voltage vectors
- Analog and digital recording tracks

TECHNICAL DATA

## PROTECTION FUNCTIONS

Protection Function	IEC 61850	IE 60617	ANSI	RN (I4U0)	RQ (I8U0)	RF (I4U4X/5X)
Tree-phase non directional overcurrent protection	PTOC	3I>>>	50P		+	
Tree-phase non directional overcurrent protection (two-stage, IEC DT, IEC NI, IEC VI, IEC EI)	PTOC	3I>, 3I>>	50P/51P	+	+	+
Circuit breaker failure protection	RBRF	3I>BF, Io>BF	51BF, 51NBF	+	+	+
Three-phase thermal protection: one- or two-body model of thermal overload (e.g. for motors, cables, dry and oil transformers)	PTTR	3ITH>F, 3ITH>>F	49 I & II	+	+	+
Three-phase bi-directional overcurrent protection	PTOC	3I>↔, 3I>>↔	67			+
Non-directional earth fault protection (two-stage, IEC DT, IEC VI, IEC EI, IEC LTI)	PTOC	Io>, Io>>	50N/51N	+	+	+
Bi-directional earth fault protection	PTOC	Io>↔, Io>>↔	67N			+
Wattmetric and zero-sequence based bi-directional earth fault protection	PSDE	Po>↔, Po>>↔ Qo>↔, Qo>>↔, P/Q	32N			+
Transient / intermittent bi-directional earth-fault protection	PTEF	Io>↔, Io>>↔	67NIEF			+
Zero-sequence energy based bi-directional earth fault protection	PTEF	Eo>↔, Eo>>↔	67NIEF			+
Displacement overvoltage protection (zero-sequence voltage)	PTOV	Uo>, Uo>>	59G			+
Three-phase under- and overvoltage protection	PTOV PTUV	3U>, 3U>> 3U<, 3U<<	59 27			+
Frequency protection	PTOV, PTUV	f>, f>>, f<, f<<	81O/81U			+
Undercurrent protection	PTUC	3I<	37	+		+
Three-phase inrush detector	PHAR	3I2f>	68	+	+	+
Load shedding and restoration	PFRQ	UFLS/R	81LSH			FE
Phase-Phase and Phase-Neutral polygonal distance protection	PDIS	Z<, Z0<, (U, I)	21, 21N, 21P			ZP
Distance Protection starting condition: current- / under impedance combined with load encroachment and V/C-starting. Integrated end-time (forward and non directional), double earth-fault detection. Combination possible with ARC and switch onto fault detection	PTOC, PSCH	Z<	21, 21N			ZP
Phase unbalance	PTOC	I2>	46PD	+		+
Busbar protection according to H2, protection interlocking system	PSCH	CLN	85N	+	+	+
QV protection	-	Q>, U<	QU			QU
Voltage imbalance	PTOV	U2>	47O			+
Two-winding transformer differential protection	PDIFF	3DI>T	87T		TF	
Over excitation protection by harmonic classification H5/H1	PVPH	H5/H1	24		TF	

## CONTROL, MEASUREMENT AND LOGIC FUNCTIONS

Protection related functions	IEC 61850	IEC 60617	ANSI	RN (I4U0)	RQ (I8U0)	RF (I4U4X/5X)

## TECHNICAL OVERVIEW

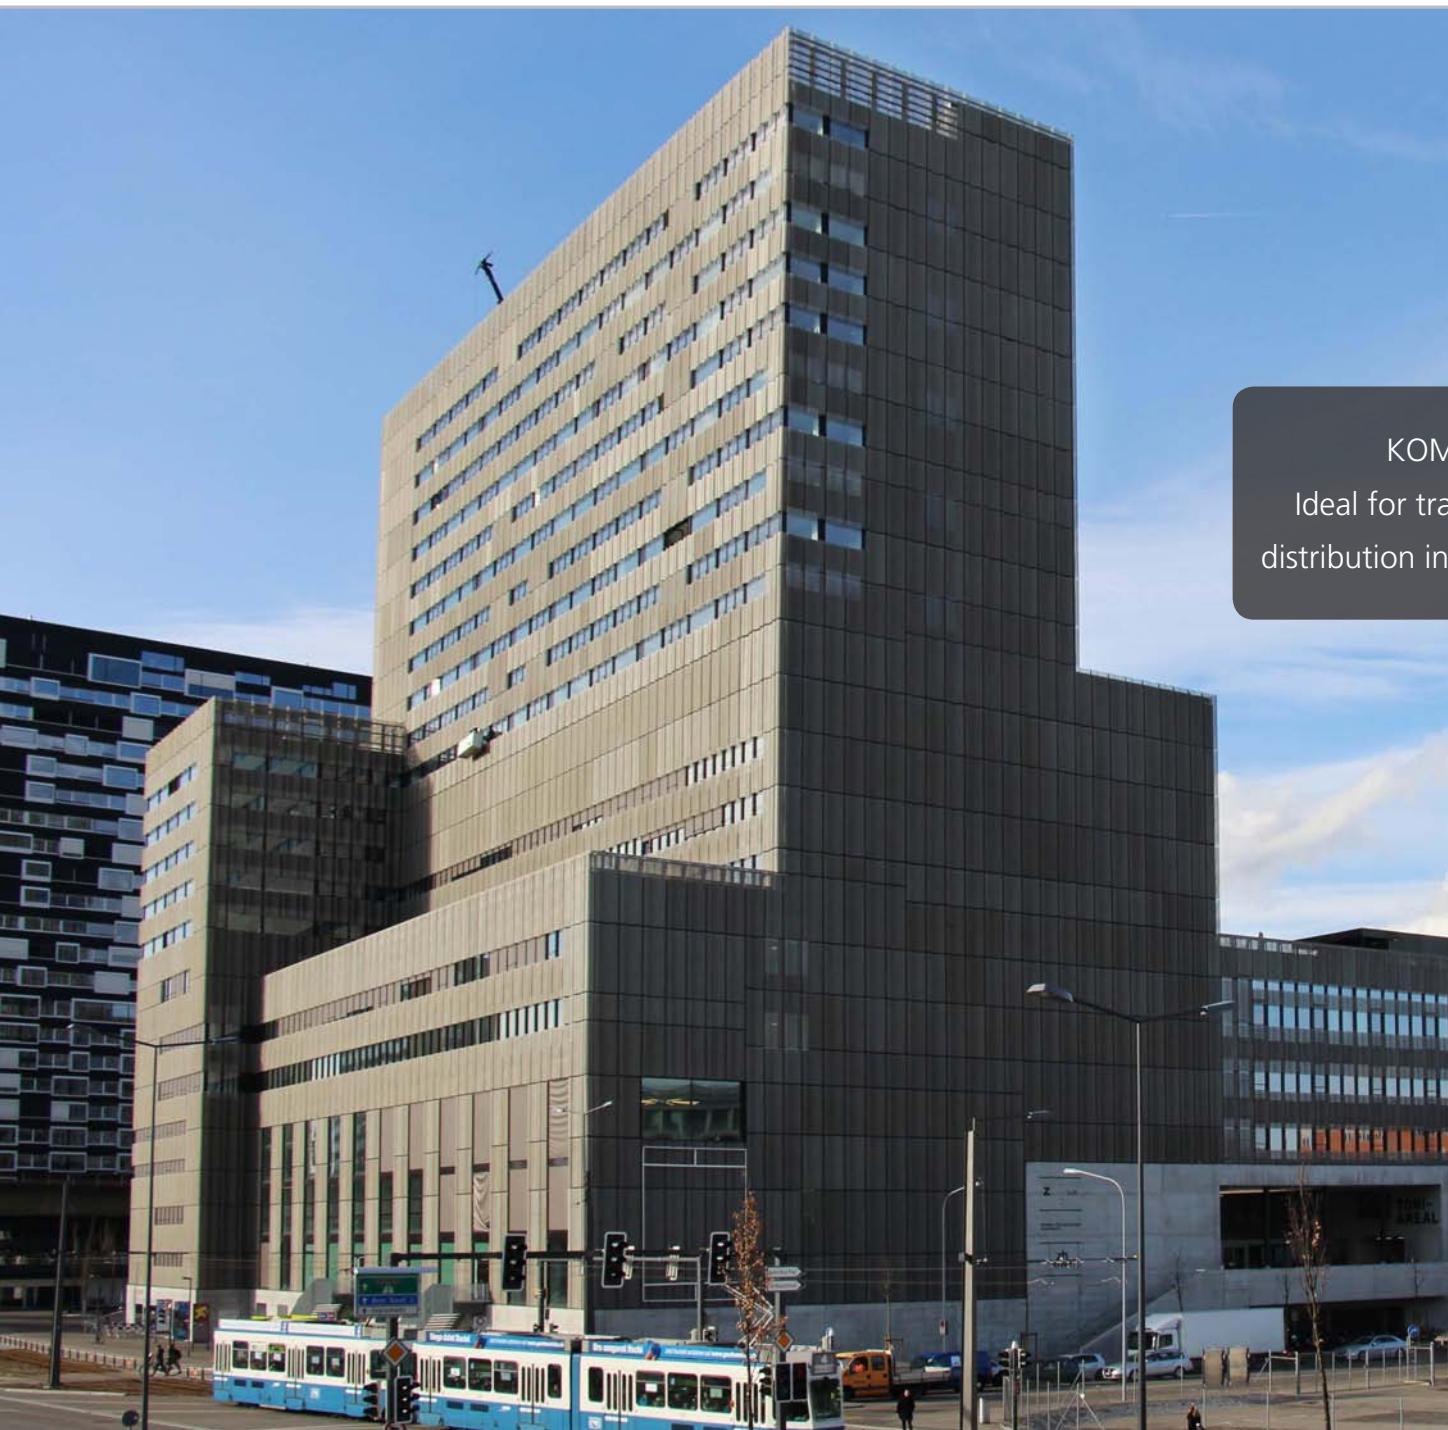

Protection functions general tolerances		
Overshoot- / Distance- / Differential-Protection	sinus-auto-correlation @ 50Hz	
Overload protection	RMS 30...1'000Hz / 0.01 ... 120 x In	
Earth-fault protection	RMS 30...1'000Hz / 0.01 ... 120 x In	
Measurement	RMS 30...1'000Hz	
General tolerances		
Start up time	15...25ms (sub cycle >>>: 10ms)	
Tolerance @ start up	<2.5%	
Timer tolerance	<1%	
Directional function	Start up: ~25ms; trip time ~32ms	
Fault locator	<1% @ line length, @ U/Usc >5% and 30<j<90°	
Distance protection	Start up ~27ms, trip time ~37ms	
Differential protection	Start up ~15ms; trip time ~20ms	
Frequency module	Start up: 80...120ms	
Vibration and shock		
Regulations	IEC 60255-21	
Sinusoidal oscillation	IEC 60255-21-1 IEC 60068-2-6	5...8Hz; +/-7.5mm amplitude 8... 150Hz ; 20m/s <sup>2</sup> acceleration, frequency sweep 1 octave/min, 20Cycle in 3 axes perpendicular on each other
Vibration shock	IEC 60255-21-2 IEC 60068-2-27	Half sine, acceleration 150m/s <sup>2</sup> , 11ms duration, each shock in both directions on all axes
Sinusoidal vibration during earthquakes	IEC 60255-21-3 IEC 60068-3-3	Horizontal: 1 ... 8 Hz, +/- 3.5mm amplitude Vertical: 1 ... 8 Hz, +/- 1.5mm amplitude horizontally @ 1g : 8 ... 35Hz Vertical @ 5m/s <sup>2</sup> : 8 ... 35Hz Frequency sweep 1 octave / min, 1cycle all axes
Half sine vibration during earthquakes	IEC 60255-21-3 IEC 60068-3-3	Acceleration 100m/s <sup>2</sup> , 16ms duration, each 1000 shocks in all directions
Vibration and shock during transportation	IEC 60255-21-1 IEC 60068-2-6	Half sine, acceleration 15g, 11ms duration, each shock in both directions on all axes
Climatic compatibility		
Regulations	IEC 60255-1  IEC 60068-2-17	Continuous operation : -10 ... + 55 ° C Storage temperature: -25 ... + 55 ° C Transport temperature: -25 ... + 70 ° C  Test condition for 16h: -25 ° ... + 85 ° C Temporarily admissible eventual displays impaired Operating from 55° for 96h: -20 ... + 70 ° C
Humidity		Throughout the year < 75 %, condensation and ice formation is not permitted Throughout the month < 95% at max .40°C, condensation and ice formation is not permitted
Installation height	<3000 m.a.s.l	

## REGULATIONS AND TESTS

Electrical tests	Norm		
Regulations	IEC 60255-1 IEEE Std C37.9.0/.1/.2 UL 508 VDE 0435	Measuring Relays and Protection Equipment	
Insulation test	Type examination Serial testing	5kV, 1.2/50µs, 0.5J 2.5kV; 50Hz, 1min	
Electromagnetic compatibility	IEC60255-26 EN 61000-6-2 VDE 0345	Replacement for 60255-22 Part 301 and 110	-1, -2, -3, -4
Electrostatic discharge immunity test	IEC 61000-4-2	Contact discharge Air discharge	6k 15kV
Irradiation in the radiofrequency field	IEC 61000-4-3	10V/m, 80% AM, 1kHz Frequency sweep Fixed frequency	80 ... 1000MHz, 1400 ... 2700MHz 80, 160, 380, 450, 900, 1850, 2150MHz
Fast transient/disturbance/burst	IEC 61000-4-4	Communications Other connections	2kV, 5/50ns, 5kHz, both polarity 4kV, 5/50ns, 5kHz, both polarity
High-energy surge immunity test	IEC 61000-4-5	Impulse Auxiliary supply  Communications Other Inputs	1.2/50µs CM: 4kV, 10 Ohm, 9µF DM: 2kV, 0 Ohm, 18µF CM: 4kV, 0 Ohm, 0µF CM: 4kV, 40 Ohm, 0.5µF DM: 2kV, 40 Ohm, 0.5µF
Immunity to conducted disturbances, induced by radio frequency fields	IEC 61000-4-6	Communications Other connections	10V; 150kHz...80MHz; 80% AM, 1kHz 20V; 150kHz...80MHz; 80% AM, 1kHz
Power frequency magnetic field immunity test	IEC 61000-4-8	constantly for 1..3 s; 50 Hz	30A 300A/m /m
Test for immunity to conducted, common mode disturbances in the frequency range	IEC 61000-4-16	Binary Input	Zone A DM: 150 V, 100 Ohm, 0.1 µF; CM: 300 V, 200 Ohm, 0.47 µF
Damped oscillatory wave immunity test	IEC 61000-4-18	Communications Other connections	CM: 1kV @ 1 MHz, 200 Ohm DM: 1kV; CM: 2.5kV @ 1kHz and 1 MHZ, 200 Ohm
Voltage dips, short interruptions and voltage variations on DC Input power port immunity tests	IEC 61800-4-11 IEC 61000-4-29	In the whole indicated auxiliary voltage range	
Radio-frequency disturbance characteristics	IEC CISPR 11	30MHz ... 1000MHz	
Conducted interference of the auxiliary voltage	IEC CISPR 22	150kHz ... 30MHz	

# KOMBISAVE

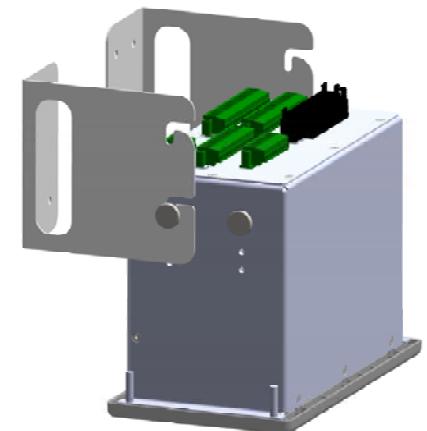

KOMBISAVE  
Ideal for transmission and  
distribution in medium voltage

## KOMBISAVE / TECHNICAL SPECIFICATIONS

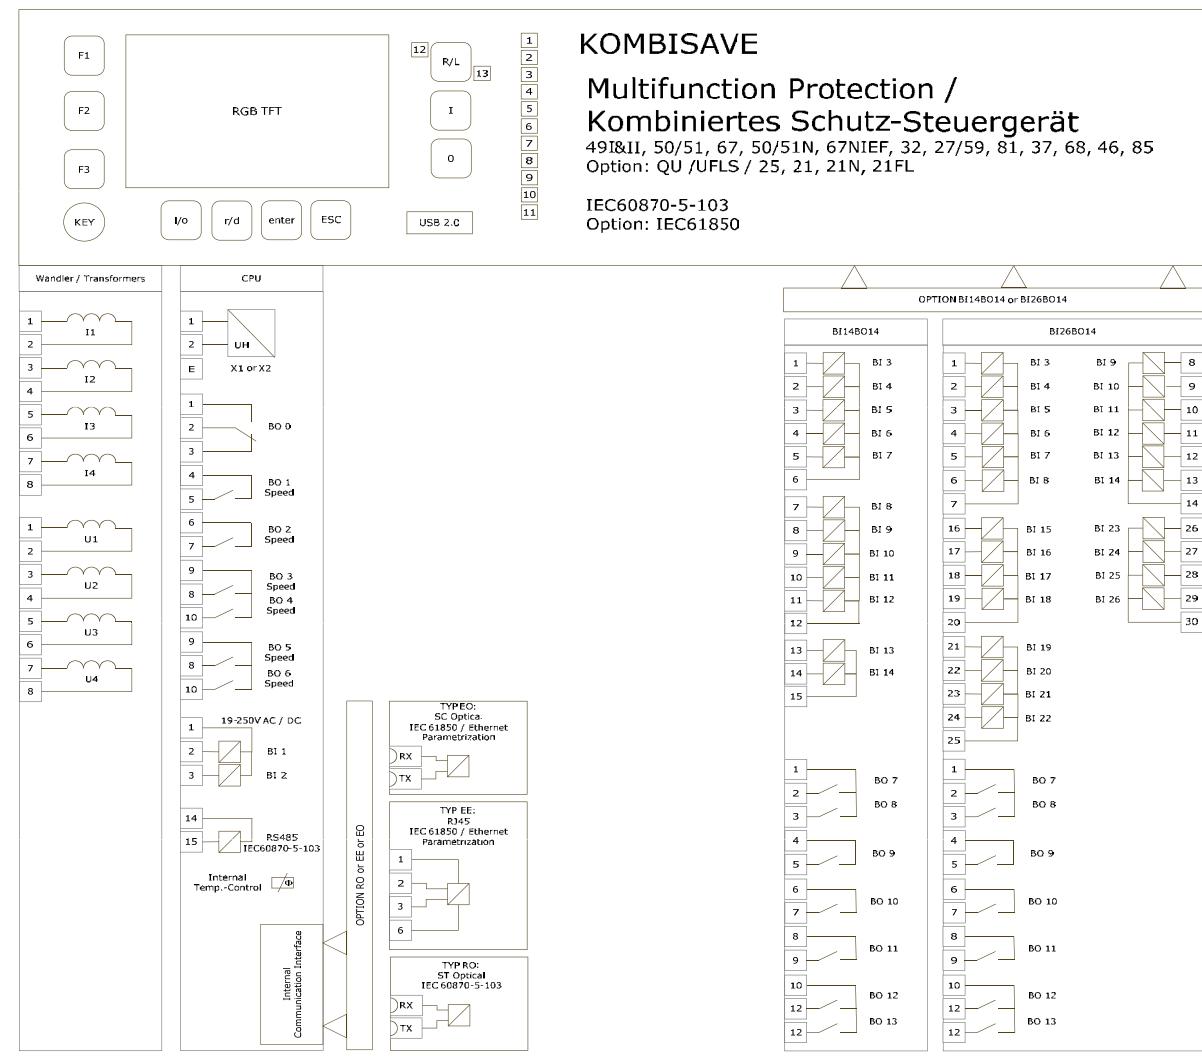

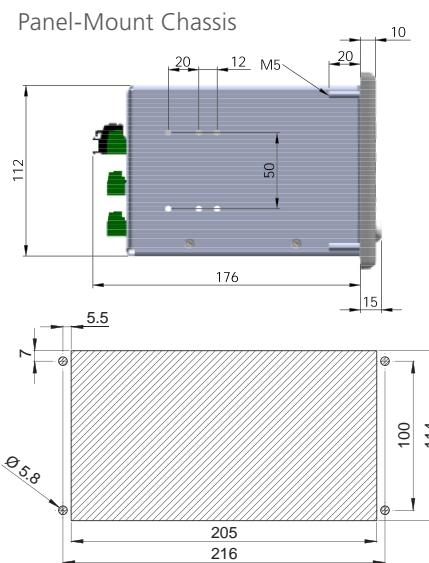

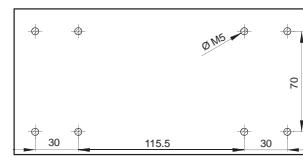

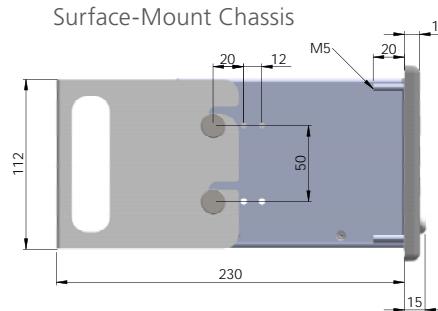

Hardware	I4U0 (RN)	I4U4X (RF)
Dimensions 19"/2; 3HE	+	+
ARM microprocessor system: 1x or 2x for IEC 61850	+	+
Energy storage for event and fault recorder: POWERCAP <7d	+	+
Binary input 20...60 / 80...250V AC/DC with integrated „contact cleaning system”; max. 220nF line capacity	14	14
Binary input 20...60 / 80...160V DC with integrated „contact cleaning system”; max 220nF line capacity	26	26
Binary output 10A@250 VAC (2000VA); standard 6ms, high-speed 3ms	BO0...6 : high-speed BO7 ... : standard	BO0...6 : high-speed BO7 ... : standard
Analog inputs	I4U0 (RN)	I4U4X (RF)
Current transformers: Nominal current 1/5A; 50Hz; Range: 0.01...64xIn; <0.2VA	4	4
Voltage transformers: Nominal voltage 100/110/400(230)V; 50Hz; Range 0.05...440 VAC; <0.2VA	-	4
Auxiliary power supply	I4U0 (RN)	I4U4X (RF)
X1: 22...28 V DC; P<10VA; bridging time (voltage dips) >50ms	X1	X1
X2: 50...275 V AC; 44...250 V DC; P<10VA; bridging time (voltage dips) >50ms	X2	X2
HMI and display	I4U0 (RN)	I4U4X (RF)
Super sharp RGB TFT display with automatic switching to power-saving mode and alarm display on grid fault	+	+
three function keys	+	+
Key switch for unlocked control operations	+	+
Local/remote key	+	+
Direct control keys	+	+
11 tri-color LEDs	+	+
USB 2.0 service interface for communication with PC or direct USB flash drive access	+	+
Communication	I4U0 (RN)	I4U4X (RF)
Standard: Electric RS-485 interface for IEC 60870-5-103	+	+
Optional: Fiber optic interface for IEC 60870-5-103	RO	RO
Standard: XML parameterization over USB	+	+
Optional: Electric Ethernet interface including parameterization over Ethernet	EE	EE
Optional: Fiber optic Ethernet interface including parameterization over Ethernet	EO	EO
Optional: IEC 61850 MMS and GOOSE (Ethernet interface necessary)	50	50

## MECHANICAL CONSTRUCTION

When mounted in brackets KOMBISAVE can be tilted down for easy access to the connectors.

## KOMBISAVE+ RQ / TRANSFORMER DIFFERENTIAL PROTECTION RELAY WITH FIELD CONTROL

Hardware: Transformer differential protection relay with field control	KOMBISAVE+ RQ	-	-	I8U0	-	-	RS	-	...
<b>Auxiliary power supply</b> 22...28V DC <10W 44...250V DC / 50...275V AC 50/60Hz < 10W		X1 X2							
<b>Analog inputs</b> 8x CT: 1A/5A (configurable), short-circuit connector				I8U0					
<b>Basic equipment (CPU board)</b> Binary Inputs: 2x 20...60V AC/DC / 80...250V AC/DC (configurable) Binary Outputs: 6x 2500VA / 3ms Watchdog: 1x 2500VA / 3ms									
<b>Additional in- and outputs B (combinable with C)</b> Binary Inputs : 8x 20...60V DC / 80...250V DC (configurable) +Binary Outputs: 10x 2500VA / 6ms Binary Outputs: 9x 2500VA / 6ms; 9x changeover Binary Outputs: 16x 2500VA / 6ms; 2x changeover					B2 Cx B3 Cx B4 Cx				
<b>Additional inputs C (combinable with B)</b> Binary Inputs: 12x 20...60V DC / 80...250V DC (configurable) Binary Inputs: 20x 20...60V DC / 80...250V DC (configurable) Binary Inputs: 12x 20...60V DC / 80...250V DC (configurable) +Analog Inputs: 4x PT100					Bx C1 Bx C2 Bx C3				
<b>Standard 1. Communication</b> Control system interface RS-485 electric for IEC 60870-5-103							RS		
<b>Optional 2. Communication</b> No further communication interface Control system interface serial fiber optic for IEC 60870-5-103 (ST-Plug, 820nm) Control system interface Ethernet electric (RJ45-Plug) DIGICOM over Ethernet Control system interface Ethernet fiber optic (SC-Plug, 1300nm) DIGICOM over Ethernet Control system interface switched Ethernet fiber optic ( 2xLC-Plugs, 1300nm ) DIGICOM over Ethernet							00 RO EE EO SO		

+RQ

Software: Transformer differential protection relay with field control	-	-	-00-00-00-00-00-	TF	-
<b>Communication requires KOMBISAVE+ RQ ...----EE/EO/SO</b> No further communication protocol Communication protocol IEC 61850		00 50			
<b>Differential protection</b> Two-winding transformer differential protection				TF	
<b>Station automation and visualization / Field control</b> No station automation and visualization / Field control Station automation and visualization / Field control					00 AU

## SOFTWARE

Software for configuration and operation SAVE protection relays	DIGICOM	-	BASIC
<p><b>Relay parameterization</b></p> <ul style="list-style-type: none"> <li>– USB or Ethernet (if interface is present on device)</li> <li>– Parameterization with access to protection manuals <ul style="list-style-type: none"> <li>– Adaptation to protected object</li> <li>– Adaptation to grid</li> <li>– Transformer adaption (CT, VT)</li> <li>– Protection functions, grouped and structured</li> </ul> </li> <li>– I/O matrix for hardware in- and outputs, communication, LEDs, logic in- and outputs of PLC</li> <li>– Hardware configuration (display timeout, minimum activation time of relays, etc.)</li> <li>– Communication settings</li> <li>– IEC 60870-5-103 data points</li> <li>– IEC 61850 <ul style="list-style-type: none"> <li>– Server configuration</li> <li>– Data set definitions</li> <li>– Report control block definitions</li> <li>– GOOSE control block definitions</li> <li>– Network input configuration</li> <li>– Intelligent control object configuration</li> <li>– Export of ICD files</li> <li>– Import of ICD files</li> </ul> </li> <li>– Station automation and visualization (PLC engineering tool, logic editor): Function has to be enabled in device as "AU" option! <ul style="list-style-type: none"> <li>– Create station visualization</li> <li>– Configure intelligent control objects</li> <li>– Create status collection with virtual LEDs and dynamic texts</li> <li>– Creation of customer-specific measured value displays</li> <li>– Creation of automation logic</li> </ul> </li> <li>– Device passwords, licenses, date and time</li> <li>– Print function</li> <li>– Compare files</li> <li>– Manage data</li> <li>– Manuals for SAVE protection devices, protection functions, automation, XRI0 filter</li> <li>– Multilingual (English, German, French, Italian)</li> </ul>			
<p><b>Single user license with USB dongle</b></p> <ul style="list-style-type: none"> <li>– Online device status (also over Ethernet if interface available)</li> <li>– Event list: read out, export to EXCEL</li> <li>– Analyze disturbance data (Measured data, RMS, harmonic analysis, vector display) with DIGIVIEW</li> <li>– Service and test functions</li> <li>– IEC 60870-5-103 test tool</li> <li>– Firmware update</li> <li>– Visualize distance protection characteristic in R/X monitor</li> <li>– Visualize differential protection characteristic</li> <li>– Analyzer for automation logic</li> </ul>			ADVANCED
<p><b>Multiuser license</b></p> <ul style="list-style-type: none"> <li>- All functions of the Advanced license in the form of a unlimited company license (key is provided as a file and can be distributed / copied within the company / contract partners unlimited)</li> </ul>			MULTIUSER ADVANCED

### System requirement

- Windows XP, Windows 7 (32 or 64bit version), Windows 10
- Memory requirements approx. 200 MB
- No installation required

## INNOVATION AT A GLANCE

### HARDWARE

Wide range power supply

Wide range binary inputs

„Contact Fitting“

Current monitoring of binary inputs

Fast electromechanical output relays

Advanced EMC tests

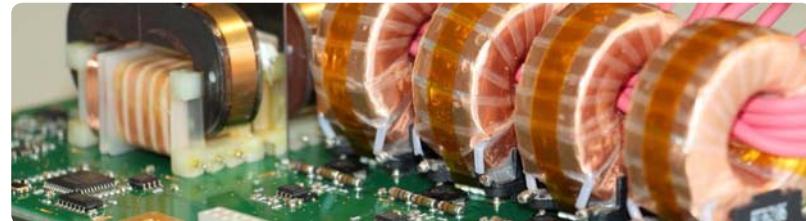

Wide range current transformer inputs

Wide range voltage transformer inputs

Plug connectors (short-circuit current connectors)

High-resolution color display

SuperCaps – no batteries necessary

### FUNCTIONS

RMS and 50Hz vectors for protection and measurement

No aging: use of software-based filters

Stabilized distance protection

Stabilized differential protection

Completely IEC 61850 Ed.1 and Ed.2 compatible

Self explanatory menu guidance, operation and parameterization

Built-in protection logic

Built-in logic (PLC)

Compensation of current transformer saturation

Ground fault protection for intermittent earth faults

Transient Earth Fault Protection: EU-Patent PCT/CH 2015/000152

Stabilized Distance Protection: EU-Patent PCT/CH 2015/000017

## SOFTWARE

Protection and automation in one

Flat menu structures for self-explanatory operation

No installation required

Small memory requirements, compact parameter files

Runs under Windows XP, Windows 7, and Windows 10

Useful test tools

Interface to OMICRON test software (XRIO)

Data readable and available in XML

Import and export of ICD files

Simple creation of station visualization

Graphical visualization of complex protection functions
